A science-expert co-teacher by your side	A hands-on, ready-to-go activity for each lesson	

Join over 400,000 Mystery Science teachers:

- Use 10-minute mini-lessons for brain breaks, circle time, and more
- Get access to 120+ full-length lessons, a standards-aligned K-5 science curriculum
- Go deeper into science with 4th and 5th grade anchor storylines: mysteryscience.com/anchor

"I teach 5th grade in California, so our students take the CAST. I was walking through the practice test with my kids last week when my principal came through. [S]he witnessed the kids' excitement when they knew exactly how to answer so many of the questions because they learned "that" on Mystery Science! The test mimicked so many of the actual activities my kids have done. They are excited to take the CAST. "
—Misty H., Bakersfield, CA
