Vocabulary

Lesson: When you turn on the faucet, where does the water come from?

aquifer	a large area of fresh water beneath Earth's surface
evaporation	the process of a liquid changing to a gas
groundwater	the fresh water beneath Earth's surface
hydrosphere	all the water (solid, liquid, gas) on and around planet Earth
model	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
