

## Lesson: What if there were no windows?

---

<b>glass</b>	a material people make that's easy to see through
<b>light</b>	what comes from the Sun and lamps and makes it possible to see things
<b>material</b>	what something is made of, like metal, wood, or plastic
<b>metal</b>	a natural material that is often shiny and you cannot see through it
<b>opaque</b>	you cannot see through it, such as with the walls of a building
<b>translucent</b>	you can kind of but not completely see through it, such as with tissue paper
<b>transparent</b>	you can see through it, such as with glass
<b>wood</b>	a natural material that comes from trees
