

## Lesson: What can magnets do?

---

<b>attract</b>	to pull toward
<b>experiment</b>	a test used to discover new information about a question
<b>force</b>	a push or a pull
<b>magnet</b>	an object that can attract or repel certain materials, often metals
<b>magnetic</b>	something that can be pushed and pulled by magnets
<b>magnetize</b>	to make a material magnetic
<b>material</b>	what something is made of, like metal, wood, or plastic
<b>metal</b>	a natural material that is often shiny and you cannot see through it
<b>property</b>	something you can observe about an object or material
<b>repel</b>	to push away, such as when two magnets with the same poles face each other
