

## Lesson: What's strong enough to make a canyon?

---

<b>canyon</b>	a deep hole in the ground formed over a long time by moving water
<b>cliff</b>	a high area of land with a side that is almost straight up-and-down
<b>erosion</b>	when tiny bits of rock are moved from one place to another
<b>experiment</b>	a test used to discover new information about a question
<b>flow</b>	to move along
<b>hill</b>	a high area of land that isn't as tall as a mountain
<b>landform</b>	a natural structure of Earth's surface, like a mountain or canyon
<b>model</b>	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
<b>mountain</b>	a high area of land with steep sides
<b>observe</b>	to pay close attention to something
<b>plateau</b>	a high area of land that is flat on top
<b>river</b>	a long, thin area of water that flows
<b>slope</b>	where one side is higher than the other
<b>steep</b>	something that is very high up on one end and very low at the other end
