

## Lesson: How much water is in the world?

---

<b>area</b>	a measurement of the surface of something
<b>data</b>	recorded measurements or observations
<b>estimate</b>	an educated guess about a number
<b>fresh water</b>	water that is not salty, such as the water in most lakes and rivers
<b>graph</b>	an image that helps you understand information
<b>hydrosphere</b>	all the water (solid, liquid, gas) on and around planet Earth
<b>ice cap</b>	a large area of frozen water found on the surface of the Earth
<b>lake</b>	a large area of water with land all around it
<b>ocean</b>	a large area of salt water that covers the Earth
<b>salt water</b>	water with salt in it, such as the ocean
<b>volume</b>	how much space something takes up
