

Lesson: Why are so many toys made out of plastic?

experiment	a test used to discover new information about a question
freeze	when a liquid turns to solid, like when liquid water freezes to solid ice
glass	a material people make that's easy to see through
invention	a new object or way of doing things that someone creates
liquid	a state of matter, such as water when you can pour it
material	what something is made of, like metal, wood, or plastic
matter	anything that takes up space; can be in different forms such as solid, liquid, or gas
melt	when a solid turns into a liquid, like when ice melts into water
metal	a natural material that is often shiny and you cannot see through it
plastic	a material people make that can be formed into almost any shape
solid	a state of matter, such as water when it is frozen ice
states of matter	the different forms of matter that include solid, liquid, and gas
wood	a natural material that comes from trees
