

Lesson: How did a tree travel halfway around the world?

animal dispersal	when an animal moves a seed from one place to another
compare	to notice what is similar and what is different between things
disperse	to move and spread out
model	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
observe	to pay close attention to something
seed	a part of a plant that can grow into a baby plant
seedling	a young plant that grows from a seed
structure	the specific form and shape of something
water dispersal	when water moves a seed from one place to another
wind dispersal	when the wind moves a seed from one place to another
