Grade 3 - Unit: Animals Through Time - Mystery 3

## **Discussion Questions** Can you outrun a dinosaur?

What can you figure out about these two animals, just by looking at their footprints? [Look at the picture on the slide]

*Hint: Can you notice how many legs the animal walks on: two or four? How many toes it has? What shape feet it has?* 

Type or write here...

Which ostrich do you think was moving faster? How do you know? [Look at the picture on the slide]

Type or write here...

Look at this image and decide: Where was Pat walking? Where was Pat running? Why do you think that?

[Look at the picture on the slide]

Animals Through Time | Mystery 3

Dinosaurs died out a long time ago. You can't race a living one. How could you figure out if you could run faster than a dinosaur?
