

How could you make the biggest fruit in the world?

## Lesson Assessment

1. Why do you think it took plant growers such a long time to create the roses sold in flower shops today?

---

---

---

---

---

2. "No two babies of a parent have exactly the same traits." How did this fact make it possible to grow giant pumpkins?

---

---

---

---

---

3. How can you tell whether two different fruits are just varieties of one kind of fruit, or if they're completely different fruits?

---

---

---

---

---

4. Just for fun: If you were going to use selection in order to create a giant fruit, which fruit would you like to make giant?

---

---

---

---

---
