Anchor Phenomenon

Date: _____ Your Ideas-Version #: _____

A black and white illustration of a night sky filled with stars of varying sizes. Below the sky is a landscape featuring rolling hills, several trees of different shapes, and a body of water in the foreground. A white rectangular box is positioned in the lower center of the image, containing a simple upward-pointing arrow and the text "Looking North" in a bold, sans-serif font.

A diagram of the night sky. The background is a dark gray field filled with numerous small white dots representing stars. On the left side, a large, curved white arc represents the horizon. In the center of the diagram is a globe of the Earth, showing the Americas. Two short black lines extend from the top and bottom of the globe, representing the Earth's axis. To the right of the Earth is a small white circle representing the Moon. Three labels in white boxes with black text are present: 'The Sun' on the left with an arrow pointing to the horizon; 'Moon' on the right with an arrow pointing to the Moon; and 'You are here (star trails photo was taken here)' in the lower right with an arrow pointing to a specific location on the Earth's surface.

If you need more space for drawings or notes, use the back of this page.
