Vocabulary

mystery science

Lesson: Can you build a chain reaction machine?

chain reaction machine	a machine that uses a series of energy transfers, such as one domino knocking over a line of dominoes
energy	the ability to do an action
energy transfer	when energy travels from one place to another
engineer	a person who uses science to come up with solutions to problems
experiment	a test used to discover new information about a question
stored energy	energy that is not in use, but is saved inside something, such as batteries or rubber bands
