

Why would a wild animal visit a playground?

mystery science

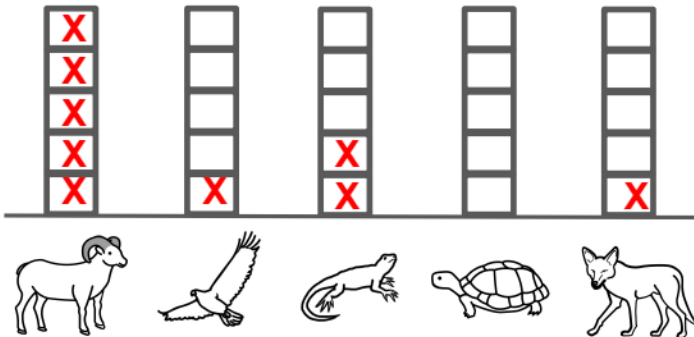

Date: _____

Name: _____

The Mystery of the Bighorn Sheep in the Park

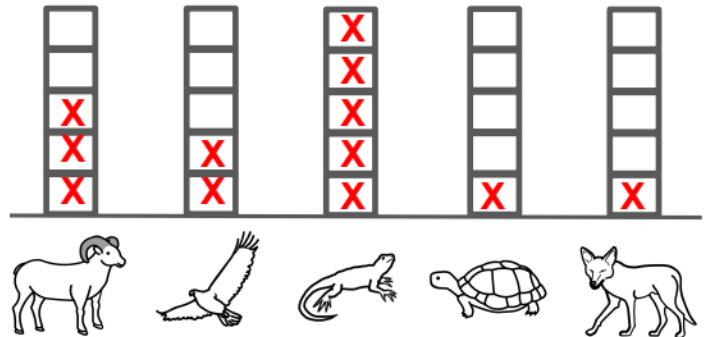

Park Habitat

What was the total number of animals that you found in the **PARK**? 9

Desert Habitat

What was the total number of animals that you found in the **DESERT**? 12

1. Did you find some kinds of animals in both habitats? **YES** NO

The desert habitat provides the bighorn sheep with more places to hide from predators, like coyotes or cougars. When they sleep at night, it's more important for the bighorn sheep to be in a habitat that provides safety.

4. Why do you think the bighorn sheep go back to the desert habitat at night?

PARK

DESERT

3. Where can the bighorn sheep hide from predators? (Circle your answer)

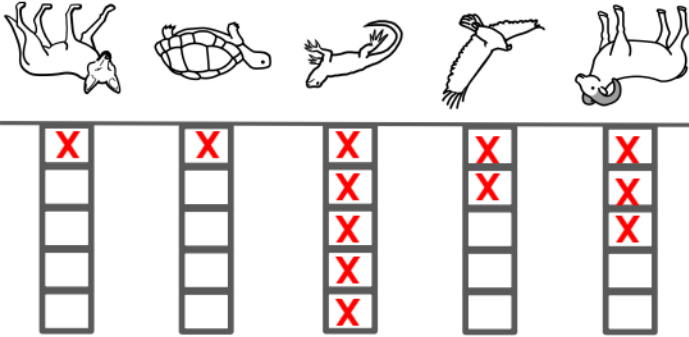

PARK

DESERT

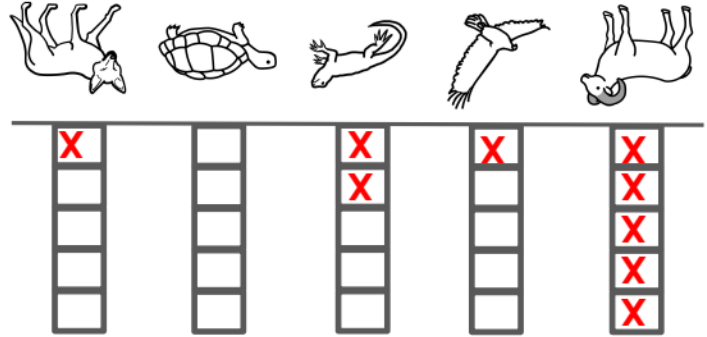

2. Where can the bighorn sheep find the most food? (Circle your answer)

1. Did you find some kinds of animals in both habitats? YES NO

What was the total number of animals that you found in the DESERT? 12

What was the total number of animals that you found in the PARK? 9

2. Where can the bighorn sheep find the most food? (Circle your answer)

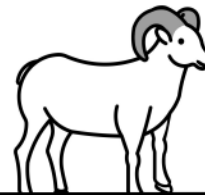

DESERT **PARK**

3. Where can the bighorn sheep hide from predators? (Circle your answer)

DESERT PARK

4. Why do you think the bighorn sheep go back to the desert habitat at night?

The desert habitat provides the bighorn sheep with more places to hide from predators, like coyotes or cougars. When they sleep at night, it's more important for the bighorn sheep to be in a habitat that provides safety.
