

## Lesson: Do worms really eat dirt?

---

<b>carbon dioxide</b>	a type of gas that plants sometimes take in and that animals release when they breathe
<b>castings</b>	worm waste (worm poop)
<b>claim</b>	to say or write an idea
<b>decomposer</b>	a living thing that can break down dead plants, dead animals, or animal waste
<b>evidence</b>	information that can be used to support or reject an idea
<b>experiment</b>	a test used to discover new information about a question
<b>fair test</b>	an experiment where only one variable is changed, and everything else stays the same
<b>fertilizer</b>	a material that contains nutrients to help plants grow
<b>nutrient (micronutrient)</b>	a substance that living things need to grow and stay healthy
<b>observe</b>	to pay close attention to something
<b>organism</b>	any living thing
<b>soil</b>	found on the Earth's surface; made of tiny rocks and material from dead plants and animals
<b>variable</b>	something that you can change in an experiment in order to test an idea
