

## Lesson: How can stars help you if you get lost?

---

<b>east</b>	one of four main directions; if you are facing north, it is to the right
<b>north</b>	one of four main directions; when you face north, west is to the left and east is to the right
<b>pattern</b>	something that happens again and again and again in a way that can be predicted
<b>south</b>	one of four main directions; if you are facing north, it is the direction behind you
<b>star</b>	a bright light that can be seen in the night sky
<b>telescope</b>	a tool used to make very distant objects look closer, often used to look at outer space
<b>west</b>	one of four main directions; if you are facing north, it is to the left
