Lesson: How can stars help you if you get lost?

east	one of four main directions; if you are facing north, it is to the right
north	one of four main directions; when you face north, west is to the left and east is to the right
south	one of four main directions; if you are facing north, it is the direction behind you
star	a bright light that can be seen in the night sky
telescope	a tool used to make very distant objects look closer, often used to look at outer space
west	one of four main directions; if you are facing north, it is to the left
