

## Lesson: How long can people (and animals) survive in outer space?

---

<b>acquired trait</b>	a trait that can change based on the environment
<b>environment</b>	all the living and nonliving things in a particular place
<b>force</b>	a push or a pull
<b>gravity</b>	an invisible force that pulls any object down, toward the Earth
<b>measure</b>	to describe something using numbers that can be compared
<b>predict</b>	to guess what will happen based on things you know
<b>trait</b>	something you can observe about a living thing, such as a person's eye color or their height
