Vocabulary

mystery science

Lesson: How long can people (and animals) survive in outer space?

acquired trait	a trait that can change based on the environment
environment	a living thing's surroundings, including other living things and non-living parts like soil, water, and air
force	a push or a push
gravity	an invisible force that pulls any object down, toward the Earth
measure	to describe something using numbers that can be compared
predict	to guess what will happen based on things you know
trait	something you can observe about a living thing, such as a person's eye color or their height
