Set Up	Explanation
Write the date and time. In the box below, draw what your experiment looks like now. Date: Time:	4a) Make a drawing that explains how you think the copper got onto the nail. Label your drawing. If you want, include things that are too small to see
3b) Describe the liquid in the bag:	4b) What evidence do you have to support the explanation that you drew? (Use information from the explanation of the explanatio
3c) Read what you wrote in question 2b (on Part 1 of the worksheet from last Mystery). 3d) Remembering what you wrote in 2b, think about what might happen in this experiment. Write your ideas:	your observations or from videos you saw in class.)

Your experiment may take a few hours to finish. If you notice something changing in the bag, draw a picture on the back of this page and write down the time.
