

## Lesson: What kinds of animals might there be in the future?

---

<b>artificial selection</b>	the process of humans choosing certain traits of living things so that they are passed to the offspring
<b>extinct</b>	a type of living thing that once lived on Earth, but no longer exists
<b>generation</b>	all the living things born and living at around the same time
<b>inherited trait</b>	a trait of a living thing that comes from its parents
<b>species</b>	one specific kind of living thing that has similar characteristics and can produce offspring with one another
<b>trait</b>	something you can observe about a living thing, such as the pointy ears of a dog
<b>variation</b>	the different versions of a trait, such as the size of a dog
