

When you turn on the faucet, where  
does the water come from?

## Lesson Assessment

1. How do most people who don't live near lakes and rivers get their water? Explain.

---

---

---

---

---

2. Pretend you have x-ray vision. You can see above and under the ground at the spot your team has chosen to dig a well. In the space below, draw these three things:

1. The land — Is it flat? Hilly?
2. The plants — Above ground and the roots underneath
3. Your well — Include the water you think is underground
