

## Lesson: What do dogs and pigeons have in common?

---

<b>ancestor</b>	a relative that lived long ago
<b>artificial selection</b>	the process of humans choosing certain traits of living things so that they are passed to the offspring
<b>breed</b>	a group of living things with specific traits that have been selected by people over time; for example, pugs are a breed of dog
<b>inherit</b>	to get a trait from parents
<b>offspring</b>	babies
<b>siblings</b>	offspring that have the same parents
<b>trait</b>	something you can observe about a living thing, such as the color of a pigeon's feathers
<b>variation</b>	differences in a trait between living things of the same kind, such as different feather colors of pigeons
