

Lesson: How long can people (and animals) survive in outer space?

| | |
|-----------------------|--|
| acquired trait | a trait that can change based on the environment |
| environment | all the living and nonliving things in a particular place |
| force | a push or a pull |
| gravity | an invisible force that pulls any object down, toward the Earth |
| measure | to describe something using numbers that can be compared |
| predict | to guess what will happen based on things you know |
| trait | something you can observe about a living thing, such as a person's eye color or their height |
