mystery science

How could you make the biggest fruit in the world?

Name: _____
Date: _____

Lesson Assessment

1. Why do you think it took plant growers such a long time to create the roses sold in flower shops today?

_____

_____

_____

_____

_____

2. “No two babies of a parent have exactly the same traits.” How did this fact make it possible to grow giant pumpkins?

_____

_____

_____

_____

_____

3. How can you tell whether two different fruits are just varieties of one kind of fruit, or if they're completely different fruits?

4. Just for fun: If you were going to use selection in order to create a giant fruit, which fruit would you like to make giant?
