

## Lesson: Why are baby birds so loud?

---

|                  |                                                                                         |
|------------------|-----------------------------------------------------------------------------------------|
| <b>behavior</b>  | what an animal does                                                                     |
| <b>food</b>      | something that animals eat                                                              |
| <b>needs</b>     | things that an animal or plant must have in order to live                               |
| <b>offspring</b> | babies                                                                                  |
| <b>pattern</b>   | something that can be observed again and again and again in a way that can be predicted |
| <b>predator</b>  | an animal that hunts and eats other animals                                             |
| <b>protect</b>   | to keep safe                                                                            |
| <b>safety</b>    | protection from getting hurt                                                            |
| <b>survive</b>   | to stay alive                                                                           |
