Vocabulary

mystery science

Lesson: Why can you smell things you can't see?

gas	a state of matter that spreads out to completely fill a space
investigate	to figure out the answer to a question or to understand how something works
liquid	a state of matter that takes the shape of its container
matter	anything that takes up space and has weight; can be in different forms such as solid, liquid, or gas
model	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
particle	a very tiny thing, too small to be seen
solid	a state of matter that holds its shape
states of matter	the different forms of matter that include solid, liquid, and gas
