Vocabulary

mystery science

Lesson: Could a volcano pop up where you live?

active volcano	a volcano that is erupting or that is likely to erupt in the future
basalt	a type of rock formed when thin, fast-moving lava cools and is usually very dark in color
erupt	when lava quickly comes out of a volcano
extinct volcano	a volcano that is not likely to erupt in the future
lava	liquid rock that flows or explodes from a volcano
map	a picture that shows the features of a place and where those features are
pattern	something that happens again and again and again in a way that can be predicted
predict	to guess what will happen based on things you know
volcano	a high area of land with an opening where lava flows or explodes out from
volcanologist	a scientist who studies volcanoes
