Vocabulary

mystery science

Lesson: How could you make the biggest fruit in the world?

artificial selection	the process of humans choosing certain traits of living things so that they are passed to the offspring
evidence	information that can be used to support or reject an idea
fruit	the part of a plant that contains seeds inside a covering, like apples
inherit	to get a trait from parents
inherited trait	a trait of a living thing that comes from its parents
seed	a part of a plant that can grow into a baby plant
trait	something you can observe about a living thing, such as the number of petals on a flower
variation	the different versions of a trait, such as the number of petals on a flower or the size of a pumpkin
variety	a particular type of fruit or flower, such as a ghost pumpkin
