

## Lesson: Why would a sea turtle eat a plastic bag?

---

<b>behavior</b>	the actions and reactions of living things
<b>brain</b>	a part of the body that receives and responds to signals from the senses and also stores memories
<b>instinct</b>	a behavior that a living thing does without being taught
<b>learned behavior</b>	a behavior that is learned based on past experiences
<b>memory</b>	information that is stored in the brain and can be remembered
<b>model</b>	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
<b>senses</b>	a part of the body (eyes, ears, nose, mouth, hands) that gathers information about the environment
