Vocabulary

mystery science

Lesson: Why would a sea turtle eat a plastic bag?

behavior	the actions and reactions of living things
brain	a part of the body that receives and responds to signals from the senses and also stores memories
instinct	a behavior that a living thing does without being taught
learned behavior	a behavior that is learned based on past experiences
memory	information that is stored in the brain and can be remembered
model	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
senses	a part of the body (eyes, ears, nose, mouth, hands) that gathers information about the environment
