

## Lesson: Why do the stars change with the seasons?

---

<b>constellation</b>	a group of stars in the night sky that form a pattern
<b>model</b>	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
<b>orbit (revolve)</b>	circling another object, like the Earth around the Sun
<b>rotate</b>	to spin or turn around a central point, like the Earth around its axis
