

Who's Calling?

1. Learn to identify frogs by their calls:

	Kind of frog	Write a few words to remind yourself of what it sounds like.
	Wood Frog	<i>Student answers will vary.</i>
	Spring Peeper	<i>Student answers will vary.</i>
	American Bullfrog	<i>Student answers will vary.</i>
	Northern Leopard Frog	<i>Student answers will vary.</i>
	American Toad	<i>Student answers will vary.</i>

2. What kind of frog do you hear in Challenge #1?

Spring Peeper

3. What kind of frog do you hear in Challenge #2?

Northern Leopard Frog

How Many Kinds of Frogs?

4. Listen to which kinds of frogs each place has:

OAKWOOD POND

In spring, this tiny pond is a shallow puddle in the woods. In summer, it dries up. There are no flowing streams or swamps here.

Oakland Pond: check off what kinds of frogs you hear

Wood Frog	X
Spring Peeper	X
American Bullfrog	
Northern Leopard Frog	
American Toad	

SWEDE LAKE

This lake has swampy places with many plants, places with shallow water, and streams flowing into the lake. There's water here all year long.

Swede Lake: check off what kinds of frogs you hear

Wood Frog	
Spring Peeper	X
American Bullfrog	X
Northern Leopard Frog	X
American Toad	X

5. Which place has more types of frogs?

My claim is that Swede Lake has more

kinds of frogs. My evidence is that

I heard four different kinds of frogs in Swede Lake, but only two kinds of frogs in Oakwood Pond.
