

# The STORM Spotter's Guide

Name: \_\_\_\_\_  
Date: \_\_\_\_\_

## mystery science

Cloud Type	Date I saw it	<input type="checkbox"/> Cumulus	<input type="checkbox"/> Cumulonimbus	<input type="checkbox"/> Stratus	<input type="checkbox"/> Stratocumulus
------------	---------------	----------------------------------	---------------------------------------	----------------------------------	--

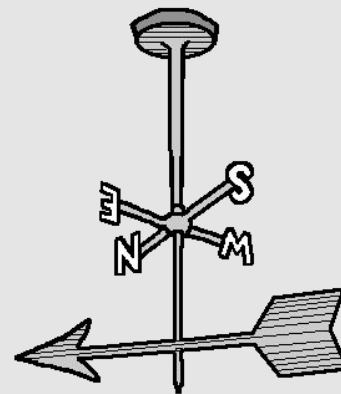

Watch the sky and make a note if you see these clouds.  
Can you spot them all?

Collect them all!

• Write down the city you live in:

• From what direction does the wind *usually* blow there?

• So, to see the weather coming my way, I can look toward:

Check the wind to find out!

Is that storm cloud heading your way?

\_\_\_\_\_ cloud

- Nice weather—no storm

But this cloud can change!  
(See next page)

\_\_\_\_\_ nimbus cloud

- Brings rain and lightning
- Storm lasts under an hour

Is it coming your way?  
(See pages 5-6)

\_\_\_\_\_ cloud

- Gloomy skies—but no storm

But this cloud can change!  
(See next page)

\_\_\_\_\_ nimbus cloud

- Brings rain
- Storm can last all day

Is it coming your way?  
(See pages 5-6)
