

Lesson: How do you build a city out of mud?

clay soil	a type of soil that has a smooth texture; water does not easily flow through it
experiment	a test used to discover new information about a question
investigate	to figure out the answer to a question or to understand how something works
material	what something is made of, like wood or stone
mixture	a combination of two or more things
model	a pretend version of something that scientists use when the real thing is too big, small, or complicated to work with
observe	to pay close attention to something
property	something you can observe about an object or material
sandy soil	a type of soil that has a rough texture; water easily flows through it
soil	tiny pieces of rock and other materials that cover the ground
texture	how something feels to touch, such as rough or smooth
weather	what the air is like at a particular time and place
